Soft Skills: Effective Communication, Teamwork, Problem Solving

Work Experience

Pedal 24

08/2023 -02/2024

Intern

Remote - In person

- Gained hands-on experience with in real world mobile app and MongoDB security, focusing on backend development best practices.
- Strengthened expertise in data management, integrity, and aggregation by solving 10+ dataset issues and standardizing distorted data into actionable formats.
- Improved in team working,

Projects

E-commerce Website for hotel management | *React, React Router DOM, React Query, Styled components and Supabase*

✳ A full-featured hotel management application designed to streamline daily operations such as bookings, guest services, and cabin oversight. It offers a centralized dashboard with real-time insights into bookings, check-ins, revenue, and occupancy. ✳ Key features include booking and cabin management, customizable hotel settings, secure user access, and a responsive interface with dark mode support.

Tech Stack:

Frontend: React.js, Context API, React Query, Styled-components

Backend: Supabase for authentication and database management
